

## QM Drain Adaptor for Schluter® Drain Flange Instructions

QM Drain Adaptor allows you to use QM drains instead of Schluter® Grate when using their integrated bounding flange (Residential 2" Drain Outlet).

It is simple, just thread the adaptor onto the QM Drain and install following Schluter®-Shower System Installation instructions for the use of KERDI-DRAIN in shower applications (Instruction can be found in the Schluter®-Shower System Installation Handbook or online at: <http://www.schluter.com>)

An advantage of using the QM Drain adaptor is that it allows you to adjust the height of the grate as need it for the tile during installation.

QM Drain is in no way affiliated with Schluter®
