

Bay Ria Series Linear Drain. Installation for concrete slab

Step 1. Determine where the drain will be positioned, frame out shower surround as required.

Step 2. Connect drain outlet **A** to waste pipe **B** using a no hub coupling. Use the adjustable feet to keep the drain channel in the correct position and level.

Step 3. Pour concrete slurry to the height of the channel bottom **C**, pitch at a $\frac{1}{4}$ " per foot slope in direction towards the shower base.

Step 4. Install hot-mop or liquid membrane per manufacturer's instructions, fully covering concrete.

Step 5. Trowel mortar to required height.

Step 6. Once floor mortar has cured, apply thin set and install tile and grout.

Step 7. Install the grate into the shower linear base.

Note:

- QM recommends this product to be installed by a licensed contractor.
- Hair Strainer basket fits inside the drain to collect hair and other debris preventing pipe clogs. Empty basket as needed to maintain optimal performance. The use of the basket is optional.
- Lifting key assists with grate removal.
- Failure to achieve adequate floor slope will result in standing water problems or slow water flow.
